V ENGINEER'S REPORT

- SR0074 (Hardees) Interconnect Project: Construction of this project is currently underway by Borough Staff. The vault has been set and underground piping work has been started. HRG has assisted with notifying PA DEP of the work and to schedule the Pre-Operation Inspection for the project. We are currently coordinating with the Staff and PA DEP to schedule this inspection, which is to be completed prior to placing the new equipment in service. We will continue to assist with the construction of this project on an as-needed basis.
- Lion's Park Tank: At last month's meeting, the Authority provided indication that the tank should undergo its next maintenance inspection (along with the other tanks) and be reviewed by IK Stoltzfus for recommendations on long-term stabilization and closure. We are prepared to further assist the Authority following this inspection and receipt of recommendations from IK Stoltzfus.
